

# Behlen Care and Maintenance

## FLOOR CLEANER

A simple and ready to use regular cleaning product recommended for Klumpp UV Oiled timber floors.

### Directions:

Spray a light mist onto a small section of the timber floor (1.5m x 1.5m approx)  
Using a dry mop with removable applicator wipe over the sprayed section.  
Continue this process for the remainder of the floor.  
Check and rinse applicator if dirty at regular intervals.  
After the final section is cleaned rinse the applicator.  
Finish by wiping the applicator over the floor using water only to create a more polished floor surface.

### Difficult Areas

For any harder to remove sections such as black shoe marks or caked on dirt (food) soak a cloth with the cleaner and apply to the area.

## FLOOR PROTECTOR

For added protection and to improve the overall appearance of a Klumpp UV Oiled timber floor.

When used it will help provide added protection against dirt and grime.

### Directions:

Use after the floor has been cleaned with Floor Cleaner.

Spray a light mist onto a small section of the timber floor (1.5m x 1.5m approx).  
Using a dry mop with removable applicator wipe over the sprayed section.  
Continue this process for the remainder of the floor.  
After the final section is completed rinse the applicator.

Please note the Floor Protector does not need to be wiped off with water.

# Behlen Care and Maintenance

## **Protection of Timber Floors**

As timber flooring is a natural product it is not indestructible from scratches or dents.

Ensure felt protectors are applied to the bottom of all furniture.

At entry and exit points place protective mats to help remove any dirt particles from underside of shoes.

Before using the Behlen Floor Cleaner or Floor Protector ensure the floor is free from any dust or dirt particles.

Use a soft vacuum cleaning head or cloth to remove dust or dirt particles prior to using the care and maintenance products.

After rinsing the mop applicator ensure any excess water is rung out before placing back onto the floor.

Regularly clip pets nails.

Avoid stiletto type heels as can cause indentations on the timber floor.

The Floor Protector does not need to be used after every clean. It can be alternated between cleans depending on the overall appearance of the floor.

## **Cleaning Equipment**

A dry mop with removable applicator is recommended to clean the floor.

The Behlen Care and Maintenance products can be sprayed directly onto the floor from the bottle they are supplied in.

Alternatively for ease of use a small amount of either product can be poured into the detachable cartridge supplied with any dry mop with removable applicator.
